

Oncology: Theory Practice

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Iconcept Press, United States, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.Oncology is a branch of medicine that deals with cancer. Onco means bulk, mass, or tumor while -logy means study. Each of the cells of the body have a tightly regulated system that controls their growth, maturity, reproduction and eventual death. Cancer begins when cells in a part of the body start to grow out of control. There are many kinds of cancer, but they all start because of out-of-control growth of abnormal cells. This book focus on the recent progress and research on oncology and serves as an essential guide for oncologists. Oncologists are medical professionals who practice oncology. These oncologists have several specific roles. They help in diagnosis of the cancer, help in staging the cancer and grading the aggressive nature of the cancer. There are totally 10 chapters in this book. Chapter 1 shows that chronic IGF-1 stimulation can bypass chemoresistance and support Ewing sarcoma cell apoptosis in combination with the death ligand Apo2L/TRAIL. The findings may have important implications for the biology as well as the clinical management of the Ewing sarcoma family of tumor. Chapter 2 tests total cfDNA concentration, cfDNA integrity, BRAFV600E mutation and RASSF1A promoter methylation associated to cfDNA in melanoma patients and healthy controls in order to identify a sequential multi-marker panel in cfDNA able to increase the predictive capability in the diagnosis of cutaneous melanoma. Chapter 3 overviews transforming growth factor-B (TGF-B)-mediated tumour suppressive pathways and outlines the molecular mechanisms of these effects. Chapter 4 reviews the contribution of urokinase-type plasminogen activator system in breast cancer; the most common cancer in women worldwide. Better understanding of the molecular biology of this malignancy leads to efficient prognosis and therapies...
