

The Lymphatic System

By Julie McDowell, Michael Windelspecht

ABC-CLIO. Hardback. Book Condition: new. BRAND NEW, The Lymphatic System, Julie McDowell, Michael Windelspecht, Beginning with an exploration of the chemicals and cells of the lymphatic system, this volume of the Encyclopedia of the Human Body discusses the various components of the lymphatic system and how they work together to initiate the immune response, act as a secondary circulatory system, and transport select nutrients from the digestive system to the circulatory system. The lymph system, including lymph nodes and lymphatic circulation are explored and lymphatic functions of the spleen, appendix, and tonsils are discussed. The history of the research on the lymphatic system is presented and the future of research in this field is considered. Current controversies and dilemmas of scientists performing this research are explored. Lymphatic system disorders and diseases, and their symptoms and treatments are explored, including leukemia, AIDS, anemia, chronic fatigue syndrome, strep infections, asthma, and allergies. This reference concludes with information about maintaining a healthy lymphatic system, a comprehensive glossary, and resources for further information including web sites and contact information for organizations and national health institutions. The Encyclopedia of the Human Body provides a complete, comprehensive reference source for students interested in the human body....
