

Technology Transfer Via Foreign Direct Investment in Central and Eastern Europe : Theory, Method of Research and Empirical Evidence

Filesize: 6 MB

Reviews

This publication is definitely not simple to begin on studying but quite fun to see. It really is full of knowledge and wisdom I am just effortlessly can get a satisfaction of studying a created pdf.
(Alfreda Bradtke)

TECHNOLOGY TRANSFER VIA FOREIGN DIRECT INVESTMENT IN CENTRAL AND EASTERN EUROPE : THEORY, METHOD OF RESEARCH AND EMPIRICAL EVIDENCE

Palgrave Macmillan, UK, 2011. Softcover. Book Condition: New. First Edition. 208 Pages. NEW. The effects of the global expansion of multinational companies are hotly disputed. Foreign subsidiaries of multinational companies are suggested as one of the main channels of technology transfer to less developed economies. In Central and East Europe their presence proved to be a decisive factor to economic restructuring and development during the transformation from the centrally planned to the market economy. This volume is a unique guide to theory, method of research, and empirical evidence for technology transfer via foreign enterprise subsidiaries. After consolidating the theory and reviewing the latest evidence, the book suggests as possible research methods a state-of-the-art application of econometrics, and an innovative field work-based approach of mezzo-analysis. Today's policy literature is filled with extravagant claims about positive effects from foreign direct investment. However, it emerges that direct technology transfer to foreign subsidiaries is subject to a variety of conditions and the hard evidence on spillover effects to the domestic economy is rather sobering. Book Description: The effects of the global expansion of multinational companies are hotly disputed. Foreign subsidiaries of multinational companies are suggested as one of the main channels of technology transfer to less developed economies. In Central and East Europe their presence proved to be a decisive factor to economic restructuring and development during the transformation from the centrally planned to the market economy. This volume is a unique guide to theory, method of research, and empirical evidence for technology transfer via foreign enterprise subsidiaries.
